ABSTRACT

This report is part of an annual national survey that examines salaries of full-time teaching faculty in 54 selected academic disciplines. Data for the study were collected from a total of 296 public and 390 private four-year institutions from the baseline year of 1996-97 to the trend year of 1999-2000. This portion of the study covers salary data for 1,038 engineering related technologies faculty at 95 public institutions and 76 faculty at 11 private institutions. A data table lists average salaries for both public and private participating institutions by faculty rank, faculty mix percent, and salary factors. Salary trend information is compared for public and private institutions for each of the two study periods with trend information for all fields and with the Consumer Price Index. The study found that for the 1999-2000 period the average salary of $52,792 for engineering related technologies faculty in public institutions and the average salary of $48,353 for faculty in private institutions were, respectively, 8.7 percent and 13.2 percent lower than the average salary for all faculty in all major fields. The average salary increase was, respectively, 1.6 percent per year and 1.0 percent per year above the cost of living as measured by the Consumer Price Index. Appended is a list of the 54 selected academic disciplines and lists of the participating public and private colleges. (SM)

ED 442 383

SALARY-TREND STUDY OF FACULTY IN ENGINEERING RELATED TECHNOLOGIES FOR THE YEARS 1996-97 AND 1999-00

Foreword

by

Richard D. Howe
Appalachian State University
Boone, NC 28608

Since 1982-83 the College and University Personnel Association (CUPA) in Washington, DC, in cooperation with Appalachian State University in Boone, NC, have conducted annual national faculty salary surveys by discipline and rank each year through 1999-00. Two separate surveys are conducted each year, one for public senior colleges and universities and the other for private senior colleges and universities.

Salary data from the 1996-97 and 1999-00 surveys were collected and tabulated for full-time teaching faculty in 54 selected academic disciplines/major fields chosen from among those defined by A Classification of Instructional Programs, 1990.

Each of the 54 academic disciplines/major fields presents a summary of the overall average salary increase in that academic discipline/major field from the "baseline year" of 1996-97 to and including the "trend year" of 1999-00 for both public and private participating institutions. Of the 357 public institutions which participated in CUPA's public survey of 1996-97, 296 also participated in the 1999-00 survey. Data from those same 296 institutions were used in both the baseline year and the trend year studies. Of the 544 institutions which participated in CUPA's private survey of 1996-97, 390 also participated in the 1999-00 survey. Data from those same 390 institutions were used in both the baseline year and the trend year.

In addition to listing the average salaries in **Engineering Related Technologies** for both public and private participating institutions by rank, including "new assistant professor," and listing the faculty mix percentage (FAC MIX PCT) and the salary factor, comparisons are made between the two public surveys and the two private surveys for each of the two study years (1996-97 and 1999-00) and with the CPI (Consumer Price index) of changes in cost-of-living.

The list of all 54 selected academic disciplines/major fields surveyed, including **Engineering Related Technologies** is found in appendix A, and the lists of all participating senior colleges and universities are found in appendixes B (public) and C (private) of this article.

SALARY-TREND STUDY OF FACULTY IN ENGINEERING-RELATED TECHNOLOGIES FOR THE YEARS 1996-97 AND 1999-00

by
Richard D. Howe

Since 1982-83 the College and University Personnel Association (CUPA) in Washington, D.C., in cooperation with Appalachian State University in Boone, North Carolina, has conducted two annual national faculty salary studies by discipline and rank through 1999-00: one for public senior colleges and universities, and the other for private senior colleges and universities.

Salary data for each study were collected and tabulated for full-time teaching faculty in 54 selected academic disciplines/major fields chosen from among those defined by A Classification of InstructionalPrograms *(CIP), 1990, including Engineering-Related Technology. The CIP defines the discipline/major field of Engineering-Related Technology as,

> A summary of groups of instructional programs that prepares individuals to apply basic engineering principles and technical skills in support of engineering and related projects.
>
> [*A Classification of Instructional Programs (Washington, D.C.: National Center for Education Statistics, [1990]. P. 93--15.0000).]

This article summarizes the overall average salary increases in the discipline/major field of Engineering-Related Technology for both public and private institutions from the "baseline year" of 1996-97 to and including the "trend year" of 1999-00. Of the 357 institutions which participated in CUPA's PUBLIC study of 1996-97, 296 also participated in 1999-00. Data from those same 296 institutions were used in both the baseline year and the trend year. Of the 544 institutions which participated in CUPA's PRIVATE study of 1996-97, 390 also participated in 1999-00. Data from those same 390 institutions were used in both the baseline year and the trend year.

This article lists the average salaries for the discipline/major field of Engineering-Related Technologies for both public and private participating institutions by rank, including NEW ASST PROF (new assistant professor), the FAC MIX PCT (faculty mix percentage), and the SALARY FACTOR. Comparisons are also made using the CPI's (Consumer Price Index) changes in cost-of-living between the two studies for each of the two study years (1996-97 and 1999-00).

The CPI uses a base period of 1982-84 and measures/tabulates prices of food, clothing, shelter and fuels, transportation, medical care, entertainment and other goods and services people buy for day-to-day living. When examining trends in faculty salary, it is important to consider any changes in the purchasing power of salaries due to inflation. Comparing changes in the faculty salaries with the CPI gives one a more precise view of what "real" salary increases are, that is, buying power.

The salary is based on a nine- or 10-month academic year salary of full-time faculty, and does not include any faculty teaching less than 51 percent. Salary for summer academic work, fringe benefits, and perquisites are also not included in the salary data. The average salary is based on the study information with the assumption that all employees are full-time. The average salary displayed is an average of all faculty salaries reported for a given rank and discipline.

"NUM" refers to the number of faculty members whose salaries were included to compute the average salary.

"N/IN" refers to the number of institutions that reported salary data for a given academic rank and discipline/major field.

The FAC MIX PCT represents the percentage of faculty in a given discipline/major field who hold a given academic rank. For example, a FAC MIX PCT factor of 36.7 for associate professors of Engineering-Related Technology in the 1996-97 public study means that 36.7 percent

of the faculty in that discipline/major field held the rank of associate professor.

The SALARY FACTOR for a given rank in a given discipline/major field represents the ratio of the average salary to the total average salary of all institutions in each of the four studies: PUBLIC 1996-97, PUBLIC 1999-00, PRIVATE 1996-97 and PRIVATE 1999-00. For example, a SALARY FACTOR of 0.98 for associate professors in the discipline/major field of Engineering-Related Technology in the 1996-97 public study means that their average salary is two percent higher than the average salary for all associate professors in all institutions in that study.

NEW ASST PROF refers to the grouping of assistant professors hired for the first time in the fall of the study year (1996-97 or 1999-00). All information for this group was included in the ASST PROF group for reporting purposes.

ALL MAJOR FIELDS refers to the entire data base for all 54 disciplines/major fields in each of the four studies. Among other things, it is used to compare the discipline/major field of Engineering-Related Technology with the entire data base for each study.

The reader will find the size of the sample on which each percentage or dollar value is based to be of particular importance. The smaller the number in the group, the greater the effect of extreme scores on a descriptive statistic such as the average. It should also be noted that any large disparity in the sample sizes between the "baseline year" of 1996-97 and the "trend year" of 1999-00 will lessen the reliability and validity of any conclusions that one might make based on a simple comparison of averages.

RESULTS OF THE TWO PUBLIC STUDIES: 1996-97 AND 1999-00

In the PUBLIC 1996-97 study in the above table, the discipline/major field of Engineering-Related Technology was reported in 96 of the 296 public institutions. The average salary of the 1,121 faculty was $48,271. This average salary was approximately 7.6 percent lower than the average salary of $51,932 for all 99,218 faculty in ALL MAJOR FIELDS in the same 1996-97 public study.

For the PUBLIC 1999-00 salary study in the above table, Engineering-Related Technology was reported in 95 of the same 296 public institutions. The average salary of the 1,038 faculty was $52,792. This average salary was approximately 8.7 percent lower than the average salary of $57,389 for all 92,638 faculty in ALL MAJOR FIELDS in the 1999-00 public study.

The three-year increase in average salaries for all faculty in the discipline/major field of Engineering-Related Technology in the public institutions studied was 11.2 percent ($52,792 minus $48,271 equals $4,521). The CPI of increase cost-of-living between October 1996 and October 1999 was 6.3 percent. In comparison, with the CPI, there was a relative increase in Engineering-Related Technology average faculty salaries over the three-year period by 4.9 percent or an average of 1.6 percent each year above the cost-of-living.

The increase in average salaries for all faculty in ALL MAJOR FIELDS over three years in the public institutions studied was 10.5 percent. In comparison to the discipline/major field of Engineering-Related Technology (11.2%), the faculty in ALL MAJOR FIELDS received a relative increase in their salaries of .7 percent less than the faculty in the discipline/major field of Engineering-Related Technology.

In the 1996-97 study the faculty mix percentage in Engineering-Related Technology is lower at the professor rank than at the assistant professor rank: 25.5 percent vs. 30.5 percent; and, lower

in the 1999-00 study it is 24.8 percent vs. 31.2 percent. The differences in faculty mix percentage at the ranks of professor and assistant professors in ALL MAJOR FIELDS for both public studies are 37.1 percent vs. 27.0 percent (1996-97) and 36.7 percent vs. 27.6 percent (1999-00).

Finally, the hiring rate of new assistant professors in Engineering-Related Technology in the public studies was lower than the hiring rate of ALL MAJOR FIELDS in 1996-97, 3.5 percent (39/1,121) vs 4.3 percent (4,221/99,218) and exactly the same in 1999-00, 4.7 percent (49/1,038) vs. 5.1 percent (4,748/92,638).

RESULTS OF THE TWO PRIVATE STUDIES: 1996-97 AND 1999-00

The PRIVATE 1996-97 salary study in the above table indicates that the discipline/major field of Engineering-Related Technology was reported in 16 of the 390 private institutions. The average salary of the 106 faculty was $44,211, an average salary 13.5 percent lower than the average salary of $50,167 for all 45,475 faculty in ALL MAJOR FIELDS in the 1996-97 private study.

In the PRIVATE 1999-00 salary study in the above table, 11 of the same 390 private institutions reported Engineering-Related Technology. The average salary of the 76 faculty was $48,353, an average salary 13.2 percent lower than the average salary of $54,710 for all 42,049 faculty in ALL MAJOR FIELDS in the 1999-00 private study.

The three-year increase in the average salaries for all faculty in Engineering-Related Technology in the private institutions studied resulted in a 9.4 percent ($48,353 minus $44,211 equals $4,142). The CPI increased cost-of-living between October 1996 and October 1999 was 6.3 percent. A more realistic increase, therefore, in the average faculty salaries of Engineering-Related Technology over the three-year time period, is 3.1 percent or 1.0 percent each year above the cost-of-living.

The three-year increase in average salaries for all faculty in ALL MAJOR FIELDS in the private institutions studied was 9.1 percent ($54,710 minus $50,167 equals $4,543). In comparison to Engineering-Related Technology (9.4%), the faculty in ALL MAJOR FIELDS increased their salaries .3 percent less than faculty in Engineering-Related Technology.

For both studies in the discipline/major field of Engineering-Related Technology, the faculty mix percentage is lower at the professor rank in comparison to the assistant professor rank: 28.3 percent vs. 30.2 percent (1996-97); and 27.6 percent vs 25.0 percent, (1999-00). The differences in the ranks of professor and assistant professor in ALL MAJOR FIELDS for both private studies are 34.0 percent vs. 29.8 percent (1996-97) and 32.4 percent vs. 30.8 percent (1999-00).

Finally, the hiring rate for new assistant professors in Engineering-Related Technology was lower than the hiring rate in ALL MAJOR FIELDS in the 1996-97 private study: 0 percent (0/106) vs. 4.8 percent (2,158/45,475) and lower in the 1999-00 private study: 1.3 percent (1/76) vs. 5.4 percent (2,288/42,049).

CONCLUSION

This article presents salary-trend information on the academic discipline/major field of Engineering-Related Technology and compares that information with both ALL MAJOR FIELDS and the CPI over a period of three years, from the "baseline year" of 1996-97 through the "trend year" of 1999-00. Two studies--one for public institutions, and the other for private institutions--were conducted for the baseline year and for the trend year--a total of four studies. A total of 2,341 (0.8) faculty in the discipline/major field of Engineering-Related Technology participated and were included in the 54 disciplines/major fields in each of the four studies and in the overall total of 279,380 participating faculty. The same 296 public institutions and the same 390 private institutions

in the United States participated in the baseline year and in the trend year.

Although the public and private studies data may be interpreted in a variety of ways, several significant points are as follows. First, the average faculty salary factors in the discipline/major field of Engineering-Related Technology for the 1996-97 public study was seven percent below that of all ranks in ALL MAJOR FIELDS (1.00); and for the 1996-97 private study it was 12 percent lower than the average faculty salary factors for all ranks in ALL MAJOR FIELDS (1.00). In both the public and private studies the average faculty salary factors for all ranks in Engineering-Related Technology in 1999-00 were eight percent below and 12.0 percent lower than the average salary factors for all ranks in ALL MAJOR FIELDS (1.00), respectively.

Second, the October 1999 CPI reflects an 6.3 percent increase over the October 1996 CPI and indicates that the faculty in Engineering-Related Technology in the public institutions received an average annual salary increase of 1.6 percent above the cost-of-living. In the private institutions the annual average salary increase was 1.0 percent above the cost-of-living.

Third, in both the 1996-97 and 1999-00 public studies and in the 1996-97 private study in Engineering-Related Technology, the professor rank FAC MIX PCTs are lower than those for the assistant professor rank. However, in the 1999-00 private study the FAC MIX PCTS were higher at the professor rank than at the assistant professor rank.

Finally, the hiring rate of new assistant professors in Engineering-Related Technology in the 1996-97 and 1999-00 public studies and in the 1996-97 and 1999-00 private studies were lower than the hiring rate of ALL MAJOR FIELDS.

Because a significant data base of average faculty salaries in the academic discipline/major field of Engineering-Related Technology has now been developed, it is anticipated that this information will serve as a valuable reference and evaluation tool for interested administrators and

professors.

Richard D. Howe is the originator and director of the annual CUPA faculty salary studies. He is a professor of leadership and educational studies at Appalachian State University, Boone, North Carolina.
